UX team augmentation

Senior UX designers and researchers who join your team directly — your tools, your process, your standards — without the hiring cycle.

Inside your team, not a handoff away

AN OUTSOURCED PROJECT

“We'll deliver it and hand it back.”

Handled separately, on someone else's process, returned as a deliverable. Useful for a defined package — but it lives outside your team's day-to-day.

TEAM AUGMENTATION

“We join your standups on Monday.”

Experienced designers and researchers work inside your existing team — your tools, sprints, and processes — adding capacity or expertise without the cost of a full-time hire, and scaling up or down as needs change.

Matched to the gap, not a generic designer

Tell us what's missing and we match a senior specialist to it — someone who slots into your process, not a junior pair of hands to supervise. Pick a gap to see the fit.

WHERE'S THE GAP?

Research gap | Interaction design | Design system | UI craft

Senior UX Researcher

Slots into discovery and your sprint cadence

Runs the studies your team doesn’t have bandwidth for — interviews, usability tests, synthesis — and feeds findings straight into your backlog.

8+ yrs	~4 days	Your tools
EXPERIENCE	TIME TO START	WHERE THEY WORK

- **Embedded, not outsourced**
  Same tools, same standups, same process — working under your direction, not off to the side.
- **Senior by default**
  Experienced specialists who need context, not supervision.
- **Scales with demand**
  Add capacity for a launch or a backlog, then scale back down — no permanent overhead.
- **You keep the wheel**
  Strategy and priorities stay with your team; augmented talent handles execution.

Capacity when you need it, without the hire

Faster than hiring

Skip the recruiting cycle and add experienced UX capacity in days, not months.

Fills specific gaps

Bring in exactly the expertise you’re missing — research, interaction design, a design system specialist — without upskilling your team.

Flexible by design

Scale support up during a launch push and down once the peak work is done.

You stay in control

Strategy and product direction stay with your team; augmented talent handles the execution.

Six principles behind the work

01 **Embedded, not outsourced**
Same tools, same process — working inside your team, not beside it.

02 **Matched to the gap**
A specialist for the specific skill you’re missing, not a generic designer.

03 **Scales with demand**
Support flexes with need — no fixed long-term commitment.

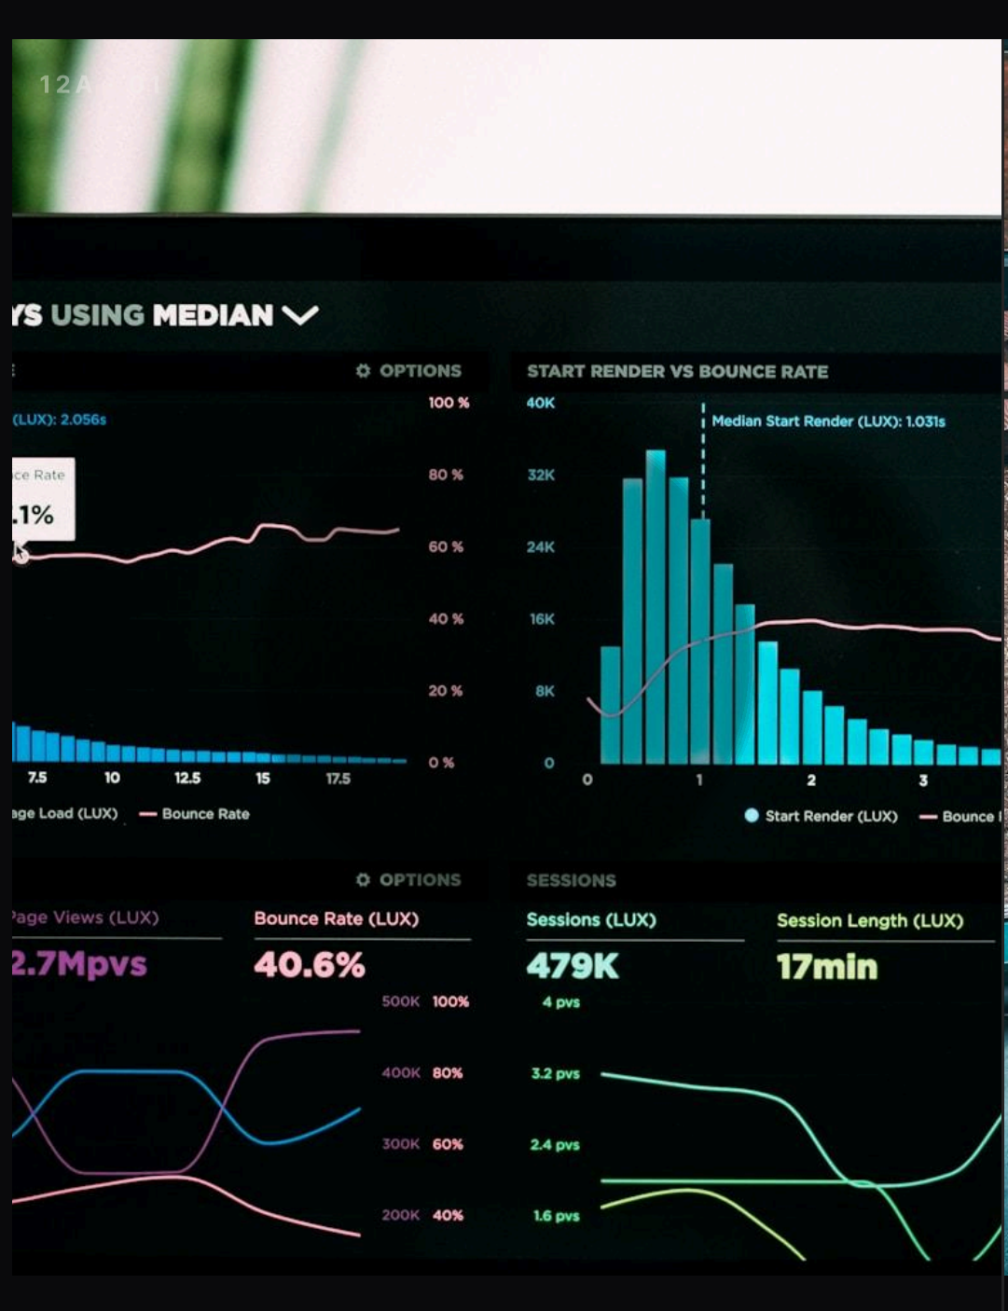
04 **You own direction**
Your team keeps ownership of priorities and product direction.

05 **Fast onboarding**
Minimal ramp-up — productive in days, not weeks.

06 **Senior talent only**
Experienced hands who work independently, not junior hires to supervise.

Embedded in the wild

A few frames off the sheet — teams we joined, and what we shipped alongside them.



SOLID

Building modern banking-as-a-service experiences

COMMON QUESTIONS

Frequently asked questions

01 How is this different from hiring a design agency for a project? ×

An agency typically owns a project end to end and works somewhat separately. Augmented talent joins your team directly — your standups, your tools, your workflow — working under your direction rather than delivering a handoff.

02 What roles can you provide? +

03 How quickly can someone start? +

04 Can we scale down once the crunch is over? +

Design team stretched thin right now?
